To whom it may concern,

I am a Director and the Operations Manager of Bolt Up Mining. We are a secondary support company servicing Underground Coal and Metalliferous Mines.

Bolt up mining have been using Clark Airtracks since 2008. We find them to be the best on the market.

We currently have six Clark Airtracks in our fleet and would not hesitate to add another when the need arises.

The reliability, efficiency and “Value for Money” cannot be overlooked!

Over the years Clark mining services have provided exceptional back up support and service.

Technical knowledge, assistance and prompt suppling of spare parts is Excellent.

Their Air track manuals are clear and thorough, making it easy to find spare parts when needed.

Rob and Gloria always provide great assistance and service.

If you have an idea and wish to make it happen- contact Rob.

As said above we would not hesitate in recommending Clarks Mining Services and Clark Air tracks to others.

For any further queries, please feel free to contact me

Kind Regards

Bill Goodwin
